

DERMA^{EN}

for a natural choice

smart and green

from Enoplastic experience and manufacturing excellence comes DERMA, a revolutionary and proprietary row material for the production of high value capsules for your wines and spirits. the exclusive technology, result of an intensive activity by Enoplastic laboratories, drives to a new generation of closures with **superior technical features** and a **low environmental impact**.

advanced manufacturing technology offering:

a material with
steadier technical features
over time

a cleaner production
process

less waste

easier application with DERMA

reduced elastic memory

superior fit to the neck
of the bottle

impressive reduction of the carbon footprint

DERMA is an exclusive environmental friendly material: the production line and the special resources used during the manufacturing process allow the reduction of

-9,76%

of the gCO₂eq for each capsule produced*

several thickness for different targets

for enoal – hoods for sparkling wines, 3 thicknesses:

DERMA 65 - for a hi-tech, minimalist aesthetics

DERMA 75 - when you need a traditional image

DERMA 100 - for any classy, contemporary product

for elite – capsules for wines and spirits, 2 thicknesses:

DERMA 200 - for an elegant look

DERMA 250 - for an exclusive and high value communication of the brand.
as alternative to tin

*average value calculated based on the production of capsules enoal and elite using DERMA

taking care of the environment, thinking about the choices we make
